

# Professional Report on Uploaded Documents

## Executive Summary

The report synthesizes key information from two primary sources: the detailed compliance dossier titled *\*Final-Detailed CEN 09-2025 Level-1-updated on 30012026-639054049190206941.pdf\**, and the *\*Annual Report 2024-2025.pdf\**. The focus is on document compliance requirements, recruitment processes, and statistical data on resource exploration reports.

## Document Overview

### Final-Detailed CEN 09-2025 Level-1

- Provides mandatory guidelines for document submission to avoid rejection.
- Emphasizes the importance of matching signatures captured during examinations, document verification, medical examination, and appointment.
  - Specifies that the signature must be written in black ink, in running cursive on white paper, and fully visible within the scan.
- Offers accommodations for Persons with Benchmark Disabilities via portal relaxations.

### Annual Report 2024-2025

- Details the number of exploration and baseline reports digitised (12,569 in total: 7,763 exploration reports and 4,806 baseline reports).
- Highlights the launch of a Management and Analysis Centre lab by the Director General on 13 November 2024.
- Describes the distribution of geological reports to state governments for auctioning, including specific minerals covered.

## Key Findings

- Compliance with signature specifications is critical; non compliance results in immediate rejection.
- The digitization initiative covers a substantial volume of reports, indicating significant data consolidation.
- The annual report's mineral breakdown demonstrates a diversified focus across rare earth elements, base metals, and industrial minerals.
- Portal accommodations support inclusive recruitment, ensuring accessibility for applicants with disabilities.

## Compliance Requirements

- All applicants must ensure their signatures:
  - Are written by the candidate only.
  - Use black ink on white paper.
  - Are in running handwriting, not block, capital, or disjointed letters.
  - Are clear, legible, and fully visible in the scan.
- Applicants should use the portal's relaxation options if they qualify as Persons with Benchmark Disabilities.
- Submitted documents must be scanned with the appropriate resolution and format as specified in the Level 1 compliance dossier.

## Conclusion

The reviewed documents underscore the necessity of stringent compliance with signature and documentation standards, while also showcasing progress in data digitisation and resource reporting. Adhering to the outlined guidelines will ensure smooth processing of applications and maintain the integrity of the recruitment and reporting processes.
